[linkedin.com/in/davitsimlife](https://linkedin.com/in/davitsimlife)

[davit@aragagency.nl](mailto:davit@aragagency.nl)

English · Dutch · Russian · Armenian

I learned AI *the only way that counts.*

Two live products. Looking for a team that ships — not slide decks.

STACK

Claude API · n8n · Supabase (Postgres, auth, RLS, pgvector) · Groq · DigitalOcean · Netlify · Vercel · Claude Code

SELECTED WORK

01 Inbox Autopilot LIVE · 2026

*AI that turns email into actions.*

- Router classifies first: extract, draft, or escalate — the model does not write blindly
- Invoice path turns unstructured mail into typed fields, not a summary
- Low-confidence mail is gated; a human gets the reason, not a guess

[autopilot.tyoma.site](https://autopilot.tyoma.site)

02 Tyoma LIVE · 2026

*Your website, already understood.*

- Page is fetched and used as context before any reply is generated
- Answers stay on that source — no brochure, no invented FAQ
- One product, three languages: English, Dutch, Russian

[tyoma.site](https://tyoma.site)

EXPERIENCE

Arag Agency Founder 2026 — PRESENT

Independent studio. Inbox Autopilot, Tyoma, and a custom system built for Miniso — live products, not decks.

Miniso Flagship Manager JUNE 2024 — PRESENT

Led the flagship: team, floor, and daily operations — the store that has to work, while Arag Agency was being built.

EDUCATION

Huva.io Academy Build with Claude COMPLETED

MBO4 Fashion & Textile

CAPABILITIES

Agentic workflows

Read → decide → act, with a human gate when the model should not be trusted.

Site-grounded chat

Assistants that start from the page, not from a hallucinated brochure.

Extraction

Unstructured mail and documents into fields you can actually book, file, or pay.

Product, not a gist

Live URLs. Loading states. Languages. The unglamorous parts that have to work on Monday.

Work, live — [buildbydavit.space](https://buildbydavit.space)

Available — AI builder. Looking for a team that ships.
