

FOUNDER OF ARAG AGENCY

Davit Simonyan

buildbydavitspace.com

davit@aragagency.nl

English · Dutch · Russian

I learned AI *the only way that counts.*

Two live products. Looking for a team that ships.

SELECTED WORK

01 Inbox Autopilot

LIVE · 2026

AI that turns email into actions.

- Invoice arrives → structured data extracted
- Inquiry arrives → a reply is drafted
- Ambiguous mail → routed to a human with a reason

inbox-autopilot-rosy.vercel.app

02 Tyoma

LIVE · 2026

Your website, already understood.

- Instant URL scan, then grounded chat
- Interface in English, Dutch, and Russian
- Built in public as a live demo for Arag Agency

tyoma.site

EXPERIENCE

Arag Agency Founder

2026 — PRESENT

Independent studio. Inbox Autopilot and Tyoma were designed, built, and shipped here — live products, not decks.

Miniso Flagship Manager

PRESENT

Store operations, team, customer floor. Current role — proof I can run something that has to work on Monday, while I ship AI products independently.

CAPABILITIES

Agentic workflows

Read → decide → act, with a human gate when the model should not be trusted.

Site-grounded chat

Assistants that start from the page, not from a hallucinated brochure.

Extraction

Unstructured mail and documents into fields you can actually book, file, or pay.

Product, not a gist

Live URLs. Loading states. Languages. The unglamorous parts that have to work on Monday.
